Cambridge Audio 550C with Wolfson DAC, Selectable Filters, & Cambridge Servo System

The Cambridge Audio Azur 550C CD player offers much of the advanced technology of the new 650C, but with a single Wolfson WM8740 24-bit/192 kHz-capable DAC instead of the 650C's dual DACs.

The 550C takes full advantage of Cambridge Audio's audio-only CD transport coupled to a highly sophisticated S3 Custom CD servo. This third-generation audiophile servo employs an all-new chipset and the latest double-sided surface-mount technology for ultra-short signal paths with freedom from wire links. The net result gives the 650C extraordinary ability to retrieve maximum digital information while maintaining extremely low jitter.

- **Single Wolfson WM8740 24/192 DAC**
- **Selectable Digital Filter with Two Settings**
- **Cambridge-Designed Servo System**

Cambridge Audio's trusted Wolfson WM8740 DAC 24-bit/192 kHz-capable DAC has now been coupled to a new version of Cambridge Audio's proprietary Double Virtual Earth Balanced filter topology with Bessel Coefficients, resulting in even greater musicality. A selectable digital filter with two settings enables you to tailor output to your tastes.

Cambridge Audio Azur 550C CD player with 24/192 DAC, selectable digital filter settings, and custom-designed servo system [CA550C], choose black or silver finish, **Reg $599, only $399.00**

Save $199

- **New, Refined Circuit Layout**
- **20 Presets Per Band**
- **RDS Display**
- **Two Antenna Inputs**
- **Azur Remote**

Cambridge Audio 550T FM/AM Tuner

Offering pure FM and AM signal reception in the true analog domain, Cambridge Audio's Azur 550T is a full-featured FM/AM RDS tuner complete with 20 presets per band and an RDS interface to display station names. The Azur's refined circuit board layout maximizes the componentry for stellar performance all around.

Locks Onto Signals with a Vice-like Grip

Thanks to its high-sensitivity design, the 550T will quickly lock onto radio signals with a vice-like grip. And you'll like what this grip extracts. It offers excellent detail and rich delivery across all broadcasts. It will pull in fringe broadcasts you may not have heard before, expanding your enjoyment of new program material. While many tuners offer AM merely as an afterthought, the 550T goes the extra mile in providing pleasant analog audio.

Twin inputs let you connect separate AM and FM antennas to the Azur to take full advantage of its dual-band capabilities.

Cambridge Audio Azur 550T FM/AM tuner [CA550T], available in silver finish only, **Regular $399, only $199.99**

"The 550A exceeds all expectations, because this seductive amplifier shines thanks to a sound quality that invites you to rediscover music from any source."

- **60-watts @ 8 Ohms**
- **Speaker A, B, A + B**
- **Oversize Toroidal Transformer**
- **6 Ins, 2 Outs**
- **IR Input**
- **Energy Star Certified for Ultra-Low Power Consumption**

Cambridge 550A 60-Watt Integrated

Cambridge Audio's Azur 550A 60-watt-per-channel integrated amp focuses on explosive sonic performance, incredible value, and timeless design. A completely redesigned output stage improves bass response and dynamics while enabling control of virtually any speaker.

Cambridge's proprietary CAP5 protection system allows for even greater dynamics and more powerful real-world performance. And like its highly respected predecessors, the 550A features an oversize toroidal transformer for excellent efficiency and extremely low noise. A high-specification Alps volume pot control ensures perfect channel balance at low levels and is complemented with new tone controls offering equally intricate level setting. The 550A offers six inputs, two outputs, a tape in, an input for iPod/MP3 players, and a wireless remote

Cambridge Audio Azur 550A 60-watt integrated amplifier with remote, in black or silver finish [CA550A], **Regular $599, now only $399.00**
